LOCKSMITH TRAINING

Four different courses from basic to advanced

COURSE: BUILDING LOCKSMITH SKILLS

Designed for those new to locksmithing or a refresher course for more experienced locksmiths

An online course that covers the basics of locksmithing, including a workbook guide with over 150 pages of information, insights, advice, and exercises. We are proud to share nearly 70 years of experience in this invaluable course for beginners as well as pros.

Both the **International Union of Operating Engineers (IUOE) Local 399** and the **Service Employees International Union (SEIU) Local 1** have chosen this workbook guide as the textbook for their Introduction to Locksmithing courses.

The following lessons are included:

- **KEYS: The Basics**
- **KEYS: Key Cutting**
- **PIN TUMBLER CYLINDERS: The Basics**
- **PIN TUMBLER CYLINDERS: Pinning**
- **MASTER KEY SYSTEMS: The Basics**
- **MASTER KEY SYSTEMS: Decoding Keys / Math for Cylinder Pinning**
- **FUNDAMENTALS OF DOOR HARDWARE**

The workbook guide/binder is yours to keep and will prove an invaluable reference guide and job aid for years to come!

COURSE: ADVANCED PINNING & KEY CUTTING

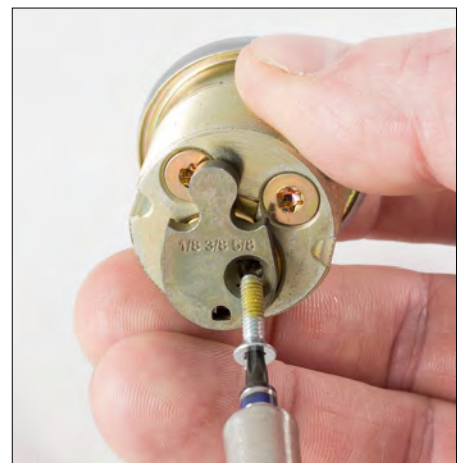

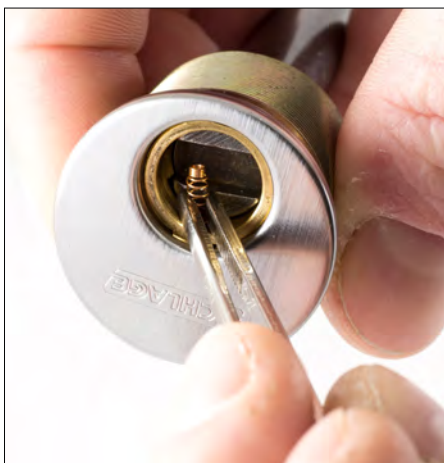

Designed for those choosing to delve deeper into our Building Locksmith Skills course

A “Hands-on” 2.0 version of BUILDING LOCKSMITH SKILLS, this course allows the student to develop useful, practical, valuable skills and competence.

After completion, the student will be able to understand, explain and demonstrate:

- **How to duplicate keys on various machines**
- **How to make keys by code using several methods & machines**
- **How to pin several different manufacturers cylinders to single keys and multiple keys (master keying)**
- **How to shim open a wide variety of pin tumbler cylinders**
- **How to remove broken keys from pin tumbler cylinders**
- **The basics of lock picking**

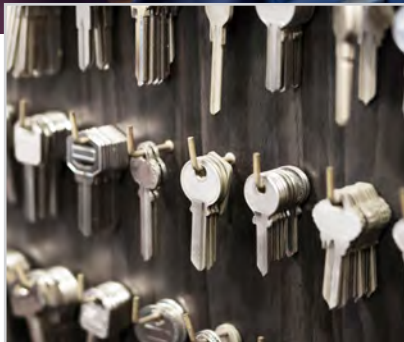

COURSE: **BUILDING SIGNATURE** LOCKSMITH TRAINING

Designed for those who would like building-specific, customized training for their building and team

There is a lot of information regarding pinning cylinders and cutting keys on the internet. While some of it is helpful, for most maintenance and engineers working in large buildings or facilities, it's simply not relevant or specific enough to be useful.

Our Building SIGNATURE Locksmith Training is a hands-on training for pinning cylinders and cutting keys. We come to **your** building and using **your** tools we train **your** team. We teach you to pin **your** locks and cylinders and cut **your** keys on **your** key machines using **your** key system. It is, quite simply, the most customized locksmith training currently available for maintenance and engineers.

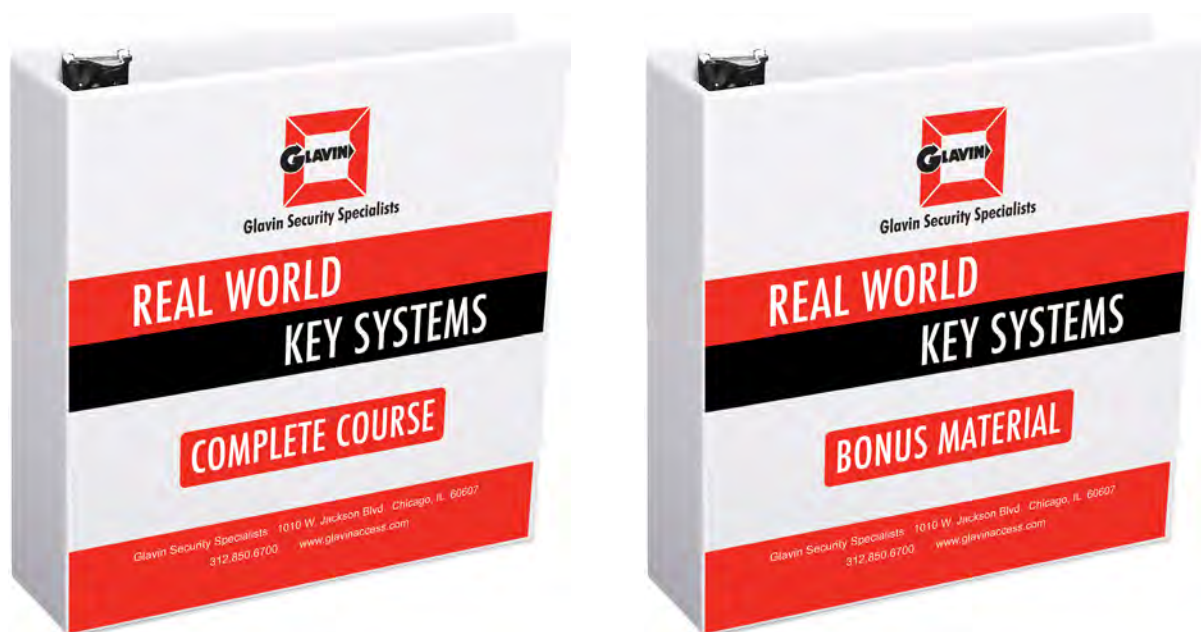

COURSE: REAL-WORLD KEY SYSTEMS

Designed for those who already skilled at pinning cylinders and cutting keys but would like to learn more about the design, development, and management of Key Systems

REAL-WORLD KEY SYSTEMS was developed to be relevant and useful for those managing systems during the real-world situations they encounter day-to-day in their buildings and facilities.

In addition to the recorded sessions, each student will receive two binders with over 500 pages of exercises, samples, blank forms, information, insights, and advice.

These binders are yours to keep and will prove an invaluable reference guide and job aid for years to come.

The course concludes with a final exam, which will be sent back to us for review, prior to receiving your certificate of completion.

If you would like to receive a self-qualifying PREREQUISITE for this webinar, or are interested in any of the courses described, just give us a call or email us at
